

Jack and the beanstalk

This week Miss Mihelyi is reading the story Jack and the beanstalk. The story is about a little boy and his mum. They throw some magic beans into the garden and they grow into a magnificent beanstalk. Watch the story using the following link

<https://youtu.be/qTMtbtvzpqQ>

Keep all of your work together to show your teacher when you next see them. You could put it into a book if you like. When you make models or take part in some role play, take a photograph and stick it in. Your teachers love seeing what you do. If you don't have a book at home you could walk to school to collect one.

Every time you do an activity, colour in a leaf from the beanstalk to show that you have completed it.

You are a star learner!

Draw the beanstalk.

This week Mrs Talkington is going to show you how to draw the beanstalk with the giant's castle at the top. You might like to stick together 2 pieces of paper together to make one tall piece. Remember the beanstalk grew all the way up to the clouds in the sky. When you have finished drawing it use different shades of green to colour in the leaves.

<https://youtu.be/b8CZEDpOujM>

Colour in the leaf, when you complete the activity.

Make a beanstalk.

Watch the step by step video to see how to create a beanstalk and castle of your own. You will need a cardboard tube, a paper plate or white card or paper, cotton wool (if you have any), glue, paints or pens. When you have completed the beanstalk you could make your own lolly stick puppets for the characters.

<https://youtu.be/-DgG-ePtxkk>

You really are a great learner!

Role play

Fee, Fi, Foo, Fum! Can you pretend you are Jack, or maybe even the giant, and act out the story with some of your family or your cuddly toys? What will you use for magic beans? What could you use for a beanstalk? Can you make your voice as big and booming as the giant's? Can you sneak in quietly like Jack did and take the hen that lays the golden eggs without waking the giant? Remember to tiptoe!

Imaginative play

Create your own Jack and the beanstalk small world using lego. Build a tower using green bricks for the beanstalk and use some white bricks for the clouds. Build a house for Jack and his Mum to live in. You could add in the vegetable garden you have designed next to it. Add some people for the Giant, Jack and Mum.

If you don't have any lego build you own using a box and other items from around the house. It would be great to see what ideas you come up with.

Wild flowers growing in Staines

Use the identification sheet at the end of the pack to name plants that you will see growing whilst out on your daily walk. I wonder what you will find growing?

Maths I spy... something that is taller, something that is shorter and something that is the same height as me!

As you go on your daily walk today or as you look around your home, measure yourself against different objects. Can you find something that is taller than you, something that is shorter and something that is the same height as you? Use the sheet at the end of the pack to record your findings.

You're flying now!

Understanding the World - Growing

Learn how to grow sunflowers with Topsy and Tim. What do you need for plants to grow? Remember to watch very carefully as they will ask you some questions at the end... and watch out for the wiggly worm!

<https://www.youtube.com/watch?v=KVqp0R1lkcM>

Plant a seed and watch it grow

You could plant a seed of your own on the windowsill, on a balcony or in your garden. If you grow a sunflower like Topsy and Tim it will start to grow very quickly. Look at this one that was planted a few weeks ago.

Design an allotment

Have a look at the presentation about how fruit and vegetables grow (link is on the website). Did you know that some vegetables grow under the ground? Some fruit and vegetables are grown in other countries and are delivered to us by aeroplanes! If you had a vegetable garden or an allotment, what fruit and vegetables would you grow? Use the sheet attached or just a blank piece of paper to design your own garden.

Singing

This week we have found some songs for you all about planting seeds and growing flowers. Maybe you could make up some actions to go with the songs. We hope you enjoy them.

Mary, Mary quite contrary
